Consulting & Project Management**

**Barrier Free Design Build Expert Master Builder
Project Manager & Construction Consultant**

Unique and innovative **Assessment, Renovation & Construction Consulting Services**

Ingenuity, integrity, a strong social connection with my team, a strong grip on the latest in technology and exceptional visuospatial skills are my strong points.

I build relationships first, and then *together* we will build or reconstruct a home

Assessment, Reporting & Expert Testimony

As a recognized expert in the housing needs of individuals with Spinal Cord Injuries, Acquired Brain Injuries and other disabilities I have testified and provided expert opinion and reports at Trials, Mediations and Arbitrations.

My unique style and method of communication is engaging and well received, both by the claimant as well as Legal Counsel. My reports are extremely detailed while still being "user friendly".

Project Management

When the project needs to be completed...on budget, on time and without compromise. My project management services ensure a transparent budget, will keep the principals in control of all of the details and perhaps most importantly will guarantee that the workmanship of all trades is up to your standards and ours.
